Hidden Gems v.2
Dec 5, 2016
Revision 1, Oct 3, 2016

A Web Application that has user profiles, a Maps API, and available comment section to post photos and comments about certain pin-dropped locations that certain users find unique or interesting.

High Level Goals:
Implementing Google Maps API
Create User Accounts
Create a Comment Section
Create a Section to Post Photos
Have a Pin Drop Illustration for Location
Have User Profile Information

User Stories for Release:
Sprint 1:
As a user, I would like to be able to create an account so that I can login.
As a user, I would like to see a map so that I can see places around me.
As a user, I would like to be able to search for specific areas through search.
As a user, I would like to pin drop a particular location

Sprint 2:
As a user, I would like to be able to make a post about a location I've visited.
As a user, I would like to be able to leave a feedback on a place that I've visited.
As a user, I would like to include pictures for a location that I've posted.
As a user, I would like to save places I've been to so that I can keep track of them.

Sprint 3:
As a driver, I would like written directions on how to arrive at a certain Hidden Gem location.
As a driver, I would like to know the distance between my current location and the Hidden Gem.

As a user, I would like to have in my profile a list of the comments, photos, and locations I've posted.

As a user, I would like a rating system for the Hidden Gems

As a user, I would like a rating system to gauge the reliability of users.

As a person, I would like direct messaging for meet ups.

Product backlog:

Chatting platform for meet ups

Bring it to Mobile Apps
